Dear Sir/Madam

I am very interested in joining Seventynine Digital, as an intern to further acquire, and sharpen my web development skills. I have over 2+ years working in the IT web-development field, designing, creating, maintaining, and teaching web-development. I am fluent in HTML, CSS, Javascript, Node.js, Java, Python, C#, and Sql, also I am well versed in the use of popular tools such as Git, non sql databases like Firebase and MongoDB.

I have two years of college education in the software development, but due to financial issues I couldn't complete my diploma, I complete a NQF level 5 certificate in Systems development and currently I am in the process of completing my NQF level 5 full Stack Web- developer Certificate.

I am especially passionate about web- development and I am always looking for an opportunity to learn more and gain hands on Experience in this field, I am a self-motivated, great problem solver and very detailed oriented. I also am very good at communicating and working in a team.

Thank you for your consideration I look forward to hearing from you.

Sincerely:

Ngceb'enhle T

Shabangu
